PROJECTS

Project : 1 : KSRTC (Kerala State Road Transport System) Management

Technology: Visual Basic, MS Access
Role: Design and coding
Responsibilities:

☐ Handling all administrative tasks which also included maintaining employee records. Updating and validating the complete employee data in the internal auto software.
☐ Handling operations like scheduling the buses, maintaining trip sheets, making route plans and fixing timings.
☐ Inventory control of materials and tools purchased as per the requirements.
☐ Vehicle management : This part includes the inventory management of vehicles.The dippo also indulges in manufacturing of buses.

Project 2 : Complaint Management System.
Technology : Java, MySQL
Role : Design and Coding
Responsibilities : In this project, we created a web based complaint management system. For this purpose the customers are given an email id which can be used for registering complaints on the purchased product . They can also register their complaints through online.The emails are converted to complaints and is assigned to the persons handling the product. The complaints are assigned to different persons and is tracked to closure. Here employee management, product management, complaint tracking

and complaint resolution are performed. Also the customer can view the complaint status by using the complaint number.
